Rules on letting this property

Energy efficiency rating for this

Properties can be let if they have an energy rating from A to E.

This property's current energy rating is C. It has the potential to be B. See how to improve this property's energy performance.

Current Score **Energy rating Potential**

B 86 l **B** 81-91 69 I C 69-80 55-68 39-54 21-38 1-20 The graph shows this property's current and potential energy efficiency.

Properties are also given a score. The higher the number the lower your fuel bills are likely to be.

Properties are given a rating from A (most efficient) to G (least efficient).

• the average energy rating is D • the average energy score is 60

Breakdown of property's energy performance

For properties in England and Wales:

Each feature is assessed as one of the following: very good (most efficient)

This section shows the energy performance for features of this property. The

assessment does not consider the condition of a feature and how well it is

average poor

(assumed)

When the description says "assumed", it means that the feature could not be

very poor (least efficient)

inspected and an assumption has been made based on the property's age and type.

good

working.

performance

save money.

(86).

This property's current environmental impact rating is D. It has the potential to be B.

Properties are rated in a scale from A to G based on how much carbon dioxide

This property's potential 1.3 tonnes of CO2 production

Properties with an A rating produce less CO2 than G rated properties.

By making the <u>recommended changes</u>, you could reduce this property's CO2 emissions by 1.9 tonnes per year. This will help to protect the environment. Environmental impact ratings are based on assumptions about average occupancy and energy use. They may not reflect how energy is consumed by the people living at the property.

Step 1: Internal or external wall insulation

Improve this property's energy

By following our step by step recommendations you

Carrying out these changes in order will improve the

property's energy rating and score from C (69) to B

Do I need to follow these steps in order?

Internal or external wall insulation

Step 2: Floor insulation

Floor insulation

Typical installation cost

could reduce this property's energy use and potentially

Typical yearly saving Potential rating after completing step1

£37 Potential rating after completing 76 | C steps 1 and 2 **Step 3: Solar water heating**

Step 4: Solar photovoltaic panels, 2.5 kWp Solar photovoltaic panels

Typical installation cost

Typical yearly saving £261 Potential rating after completing 86 | B steps 1 to 4 Paying for energy improvements

help you buy a more efficient, low carbon heating system for this property.

Estimated energy used to heat this property Type of heating Estimated energy used **Space heating** 11234 kWh per year Water heating 1978 kWh per year

For advice on how to reduce your energy bills visit Simple Energy Advice.

Heating a property usually makes up the majority of energy costs.

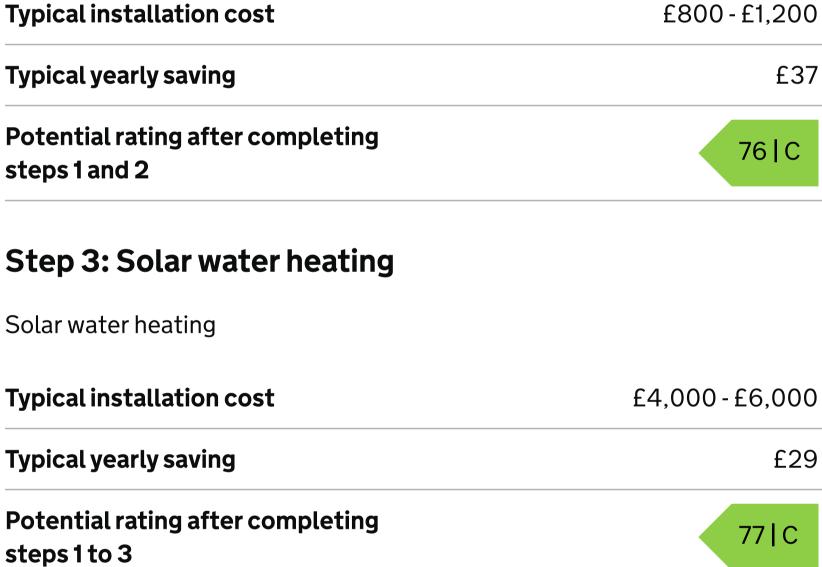

Heating use in this property

This EPC was created by a qualified energy assessor. If you are unhappy about your property's energy assessment or certificate, you can complain to the assessor directly.

Accreditation scheme contact details

Email enquiries@elmhurstenergy.co.uk **Assessment details Assessor's declaration** No related party **Date of assessment** 19 November 2014

Certificate number 0101-2851-7627-9297-9425 Valid until 18 February 2023

You might be able to get a grant from the Boiler Upgrade Scheme. This will

Find energy grants and ways to save energy in your home.

Estimated energy use and potential savings Estimated yearly energy cost for this property **Potential saving** The estimated cost shows how much the average household would spend in this property for heating, lighting and hot water. It is not based on how energy is used by the people living at the property. The potential saving shows how much money you could save if you complete each recommended step in order.

Amount of energy saved Type of insulation **Loft insulation** 26 kWh per year Solid wall insulation 2919 kWh per year

Potential energy savings by installing insulation

Contacting the assessor and

assessors are qualified to carry out EPC assessments.

accreditation scheme

If you are still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme. Accreditation schemes are appointed by the government to ensure that
