 Breakdown of property's energy performance How this affects your energy bills

Valid until Certificate number 8 February 2033 1537-7722-8200-0878-3202 **Property type** Ground-floor flat 59 square metres **Total floor area**

Energy rating

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions.

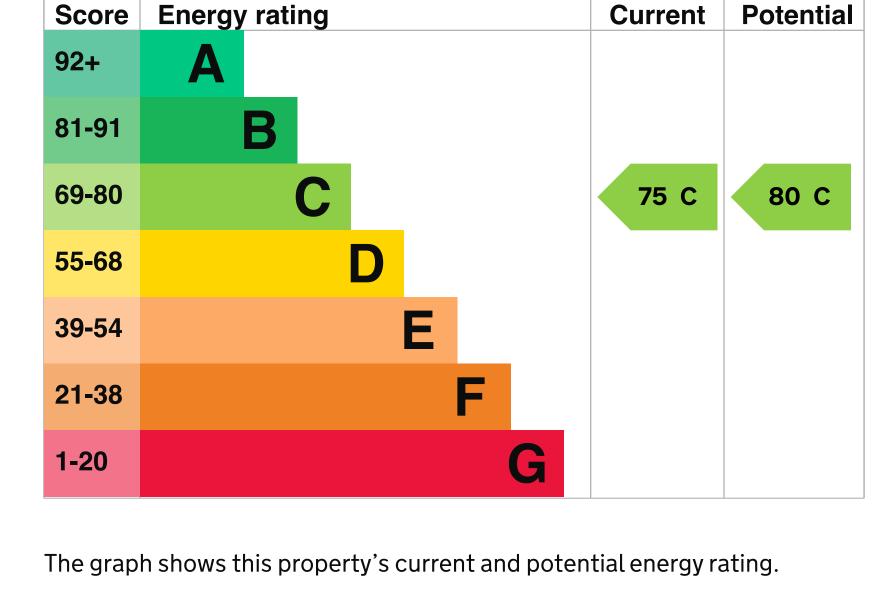

Rules on letting this property

This property's current energy rating is C. It has the potential to be C.

Energy rating and score

See how to improve this property's energy efficiency.

Score | Energy rating

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

Breakdown of property's energy

For properties in England and Wales:

• the average energy score is 60

• the average energy rating is D

Features in this property

efficient they are. Ratings are not based on how well features work or their

performance

condition. Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Features get a rating from very good to very poor, based on how energy

Description Rating **Feature** Cavity wall, as built, insulated (assumed) Wall Good

Window	Fully double glazed	Good
Main heating	Boiler and radiators, mains gas	Good
Main heating control	Programmer, room thermostat and TRVs	Good
Hot water	From main system, no cylinder thermostat	Average
Lighting	Low energy lighting in all fixed outlets	Very good
Roof	(another dwelling above)	N/A
Floor	Suspended, insulated (assumed)	N/A
Secondary heating	None	N/A
Primary energy	use	

About primary energy use

square metre (kWh/m2).

The primary energy use for this property per year is 174 kilowatt hours per

How this affects your energy bills

of your energy bills. You could save £101 per year if you complete the suggested steps for

improving this property's energy rating. This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot

An average household would need to spend £510 per year on heating, hot

water and lighting in this property. These costs usually make up the majority

Heating this property Estimated energy needed in this property is:

• 2,953 kWh per year for hot water

Carbon emissions

energy.

• 1,711 kWh per year for heating

water and lighting.

This property's current environmental impact rating is C. It has the potential to be B.

Impact on the environment

An average household produces 6 tonnes of CO2 This property produces 1.8 tonnes of CO2

Properties get a rating from A (best) to G (worst) on how much carbon

dioxide (CO2) they produce each year. CO2 harms the environment.

1.3 tonnes of CO2 This property's potential production

These ratings are based on assumptions about average occupancy and

energy use. People living at the property may use different amounts of

You could improve this property's CO2 emissions by making the suggested

Changes you could make

Typical installation cost **Typical yearly saving**

Help paying for energy improvements

Step 1: Hot water cylinder thermostat
